

STRATEGIES FOR ACTION

Don't let yourself be exploited and used. These three websites will help you make informed choices.

Opt out of global data surveillance: Prism Break

<https://prism-break.org/en/>

We all have a right to privacy, which you can exercise today by encrypting your communications and ending your reliance on proprietary services. Prism Break helps you too choose safe software and digital communication services like operating systems, e-mail clients, web browsers, file storage and more.

Help make mass surveillance of entire populations uneconomical!

Opt out of global data surveillance programs like

PRISM (https://en.wikipedia.org/wiki/PRISM_%28surveillance_program%29),

XKeyscore (<https://en.wikipedia.org/wiki/XKeyscore>), and

Tempora (<https://en.wikipedia.org/wiki/Tempora>).

Digital freedom: Framasoft

<https://framasoftware.org/en/>

Remain control of your digital tools. Framasoft offers, mainly online, a set of concrete and practical tools like free software (directory, USB sticks, installer...); free cultural creations (blog, translation, publishing house...) and free services (more than 30 free services in the project De-google-ify Internet <https://degooglisons-internet.org/>).

An emancipatory digital world is possible through actual actions in real world and online, with and for you.

Exposing the Invisible: The Kit

<https://tacticaltech.org/#/news/exposing-the-invisible-the-kit>

The Kit is a starting point for anybody who is curious to question information that is false, find information when it is scarce and filter information when it becomes overwhelming.

In The Kit you'll find step-by-step methods such as scraping information from websites, using maps to uncover hidden details, and investigating a supply chain to see the journey of a product. Whether your motive is to seek corruption, verify an article or just get to know your neighbourhood, The Kit will teach you how to do so in a safe, and thorough way.

Strategies for Action is provided by *Survival Kit for the Age of Technology* – a Future DiverCities LAB organized by BEK – Bergen Centre for Electronic Art. Bergen, June 10th – 16th 2019.
